DETAILED ACTION

Receipt of amendment filed 10-24-02 is acknowledged. Claims 2 and 5-52 are canceled and claims 1, 3, and 4 have been amended as requested.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3, and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The instant claims recite "up to 60%" and therefore include 0% antiviral agent. Accordingly, it is unclear how an effective dose of antiviral can be administered without said drug. For purposes of examination, the claims are interpreted as being capable of releasing a drug with the instant parameters.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1615

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1, 3, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudnic et al (5,952,004; hereafter '004) in view of Eckenhoff et al (4,692,326; hereafter '326) or Rudnic et al (5,952,004; hereafter '004) in view of Eckenhoff et al (4,800,056; hereafter '056).

7. '004 teaches stable, liquid, microemulsion drug delivery systems for poorly soluble active agents. These formulations are administered in capsules such as controlled release capsules and are liquids having the formulation as the instant claims (i.e. self-emulsifying formulation). '004 does not teach how the capsules are configured to release the formulation over the controlled period of time.

8. '326 and '056 both teach controlled release oral capsules comprising liquids that provide sustained release for a period of 1 hour to months. In other words, '326 and '056 teach tailoring of the dosage form in accordance with the ingredients of the capsules. Accordingly, it would have been obvious to one skilled in the art at the time of the invention to adjust the amounts and types of fluid imbibing and retaining polymers for forming the hydrophilic, expandable push member, osmotically effective compound,

Art Unit: 1615

swellable, expandable polymer in accordance with the semipermeable wall and inner member or layer to achieve the instant dosage form configuration with the motivation of providing controlled release of the formulation.

9. Accordingly, it would have been obvious to one skilled in the art at the time of the invention to combine the liquid formulation of '004 with the dosage form of '326 or '056 and the motivation of providing a prolonged release formulation of the liquid active agent that is stable.

Response to Arguments

10. Applicant's arguments filed 10-24-02 have been fully considered but they are not persuasive. Applicant argues that a *prima facie* case of obviousness has not been presented since the references do not specifically set for the release profile as currently claimed. This argument is not found persuasive. It is the position of the Examiner that combination of the references teaches one skilled in the art at the time of the invention that the release profile can be "tailored" through adjustment of the ingredients in the capsules.

Conclusion

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
